ABSTRACT

Designed to provide information about the Vocational Career Assessment Instruments Collection maintained at the New Jersey Occupational/Consumer Resource Center, this handbook contains a complete listing of the instruments in the test collection, a descriptive summary information sheet for each test, a list of test publisher information, and a reference bibliography of books and other materials on testing that are available at the resource center. Information regarding appropriate test use and advice on test selection and administration is also included. The test collection includes 40 of the most widely used vocational and career assessment instruments. The summary information sheet for each test provides: (1) name of the instrument; (2) author; (3) a brief description; (4) grade/age level; (5) method of administration; (6) scoring information; (7) publisher's name and address; and (8) additional comments such as where reviews of the test can be located. INTRODUCTION

The Vocational Career Assessment Instruments Reference Handbook was designed to provide information about the Vocational Career Assessment Instruments Collection maintained at the New Jersey Occupational/Consumer Resource Center (E.I.C.-C's Edison Program). The test collection contains many of the most widely used Vocational and Career Assessment Instruments. In the collection are copies of sample tests, specimen sets, and when available, test manuals.

The Handbook contains a complete listing of the Instruments in the test collection, Descriptive Summary Review Sheets for each test, and a list of Test Publisher Information. The Handbook also contains a Reference Bibliography featuring books and other material dealing with testing that are available at the Resource Center. Information regarding appropriate test use and advice on test selection and administration is also included.

The following procedure should be followied when reviewing the collection: Review the alphabetical ist of tests in Section A of the Handbook. After you have identified a test by name and number turn to Section B which contains summary information for each test. The summary Review Sheet will include the name of the test and a brief description. Information about administration and scoring is provided and the Test Publisher Section C is also listed. If the instrument has been reviewed in either the National Vocational Guidance Association's Counselor Guide To Vocational Guidance Instruments or the Mental Measurements Yearbook, a notation will appear at the bottom of the Summary Sheet.

If you require detailed information about validity and reliability we recommend that you carefully review the test manuals and other reference material.

If you would like information about cost we suggest you refer to the test publisher catalogs that will be maintained with the collection. Since prices are subject to change, it is advisable to contact the test publishers directly to obtain the latest price information.

After you decide on a test you wish to review, inform the Resource Center reference staff of the name and number and they will retrieve the test from the file.

NOTE: TESTS CANNOT BE CIRCULATED OR REPRODUCED.

After you have completed your review please return the test to the reference desk.

If you cannot find the test you need or if there is insufficient information in the collection, you may wish to explore two other sources of information abailable in New Jersey:
